

World Robot Olympiad 2025

RoboMission – Senior

Extra-Task “Randomization Madness” for the International Final published on October 9th 2025

The additional randomization will happen every round!

The randomization on the RoboMission Senior game field has gone mad. The starting positions of the bolts are randomized and the orientation of the payload is switching each round. No additional points are awarded.

 <p>Original starting position of bolts</p>	 <p>Original starting position of payload</p>
 <p>Example 1</p>	 <p>Example 1</p>
 <p>Example 2</p>	 <p>Example 2</p>

The pictures just show examples. Any randomization is possible. **This challenge does not result into any changes in the scoring.**
